

Software Engineer .NET Full Framework (m/w/d)

Digitalization of Wire Harness Production

DiIT GmbH, based in Krailing near Munich, is the world's leading manufacturer of integrated software solutions for controlling the production of wire harnesses in the automotive industry. Topics such as autonomous driving and electric drives will seriously change these products and their production. We accompany our customers in this challenging phase and would like you to join us!

As an independently managed company, DiIT is part of the Schleuniger Group. Schleuniger is a globally active technology group and a leading supplier to the cable processing industry.

Our offer

- Plenty of room for your own ideas
- Flexible working hours and mobile working
- Modern working environment in a cloud-based infrastructure
- Welcoming office in one of the most beautiful regions of Germany
- Informal, open atmosphere
- Support for your individual development
- Very secure job in a healthy company
- Participation in the „JobRad“ program

Your tasks

- As part of an international team, you will work on our most important, well-established solution for production control in our customers' factories.
- You will be part of the transition towards our next generation software, shaping the expertise gathered in decades onto a modern technological foundation.
- We work together in small, agile teams and rely on modern technologies, frameworks and tools.

Your profil

- In the field of software development, specifically in the Microsoft stack, you have profound expertise. Experience in .NET 3.5, WinForms and SQL (MySQL) databases would be beneficial.
- You enjoy designing software, even for non-trivial problems, and you have a good command of the implementation up to the start of operations.
- You find it appealing to actively accompany the development of classic applications towards cloud-based service models.
- You are open-minded towards new technologies as well as ambitious requirements and approach them with a high level of commitment and distinct personal responsibility.
- Achieving a result together as a team is a highly motivating goal for you, to which you can make an important contribution not least through your communicative manner (gladly in German and English).

We are looking forward to your application!
